SUMMARY

Computer Science undergraduate at Usman Institute of Technology with hands-on experience in web development, backend development, mobile applications, databases, and data science. Currently working on a digital auction and marketplace platform as a Final Year Project. Interested in software engineering, backend development, and building practical software solutions.

EDUCATION

Usman Institute of Technology (UIT University), Karachi

Bachelor of Science in Computer Science

Expected Graduation: 2027

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Dart, SQL
- **Web:** HTML, CSS, JavaScript
- **Backend:** Node.js, REST APIs
- **Mobile:** Flutter, Firebase
- **Databases:** PostgreSQL, MongoDB, Oracle
- **Tools:** Git, GitHub, Docker, Power BI
- **Core Areas:** Data Structures & Algorithms, Database Systems, Big Data, Information Security, HCI

PROJECTS

Digital Auction & Marketplace Platform — Final Year Project

- Developing a full-stack marketplace platform with fixed-price and auction-based selling.
- Working with TypeScript, Node.js, PostgreSQL, Redis, APIs, authentication, and real-time features.

TeachMeter — Academic Review Platform

- Developed a platform for students to review and discover university teachers.
- Worked with HTML, CSS, JavaScript, Node.js, PostgreSQL, Prisma, Redis, and JWT authentication.

Hospital Appointment App — Flutter

- Developed a mobile application for browsing doctors and booking appointments.
- Worked with Flutter, Firebase, local storage, navigation, and application state.

Recipe Recommender — DSA Project

- Developed a recipe recommendation project using data structures and algorithms.
- Applied searching, filtering, and data organization concepts.

Lost & Found Portal — Database Project

- Developed a database-based lost and found management system using Oracle and SQL.
- Implemented separate functionality for users and administrators.

Arduino Distance Measurement System

- Built a distance measurement system using Arduino and an ultrasonic sensor.
- Programmed the system to measure the distance of nearby objects.

CERTIFICATIONS

- **Data Science with Python — CodeWithHarry**
- **Huawei Certification** — Certificate details to be added

ADDITIONAL EXPERIENCE

- Collaborative development using Git and GitHub
- Experience working with branches and pull requests
- Backend API development and integration
- Database design and management
- Currently contributing to and learning from an existing TypeScript backend codebase

AREAS OF INTEREST

Software Engineering • Backend Development • Full-Stack Development • Mobile Development
• Databases • Artificial Intelligence & Machine Learning
